About Extend B2B

Extend B2B – Ecommerce AIO is a powerful WooCommerce extension designed to transform standard online stores into fully-featured B2B and wholesale ecommerce platforms.

It centralizes wholesale pricing, customer-specific rules, catalog visibility, and ordering workflows into one streamlined system—eliminating the need for manual processes or multiple plugins.

Built for scalability, Extend B2B enables store owners to manage B2B and B2C customers from a single WooCommerce setup, offering tailored pricing, controlled access, and flexible purchasing rules. From role-based pricing and minimum order requirements to quote requests and bulk ordering, it empowers businesses to sell smarter and grow faster.

Solution we Provide

As developer, we built Extend B2B – Ecommerce AIO for WooCommerce to solve complex B2B and wholesale requirements within WooCommerce while keeping performance, scalability, and maintainability at the core.

The goal was to replace fragmented wholesale plugins and manual workflows with a single, extensible B2B architecture that integrates natively with WooCommerce and supports long-term business growth.

01

Custom B2B Architecture

Designed and implemented a modular B2B system on top of WooCommerce, enabling role-based pricing, catalog visibility, and purchasing logic without affecting core performance.

02

Dynamic Pricing Engine

Developed a flexible pricing engine supporting customer-specific pricing, quantity-based discounts, and conditional rules—applied consistently across product, cart, and checkout.

03

Role-Based Access & Visibility

Implemented granular access control to manage product visibility, pricing display, and purchasing permissions for B2B, wholesale, and retail users.

04

Automated Wholesale Workflows

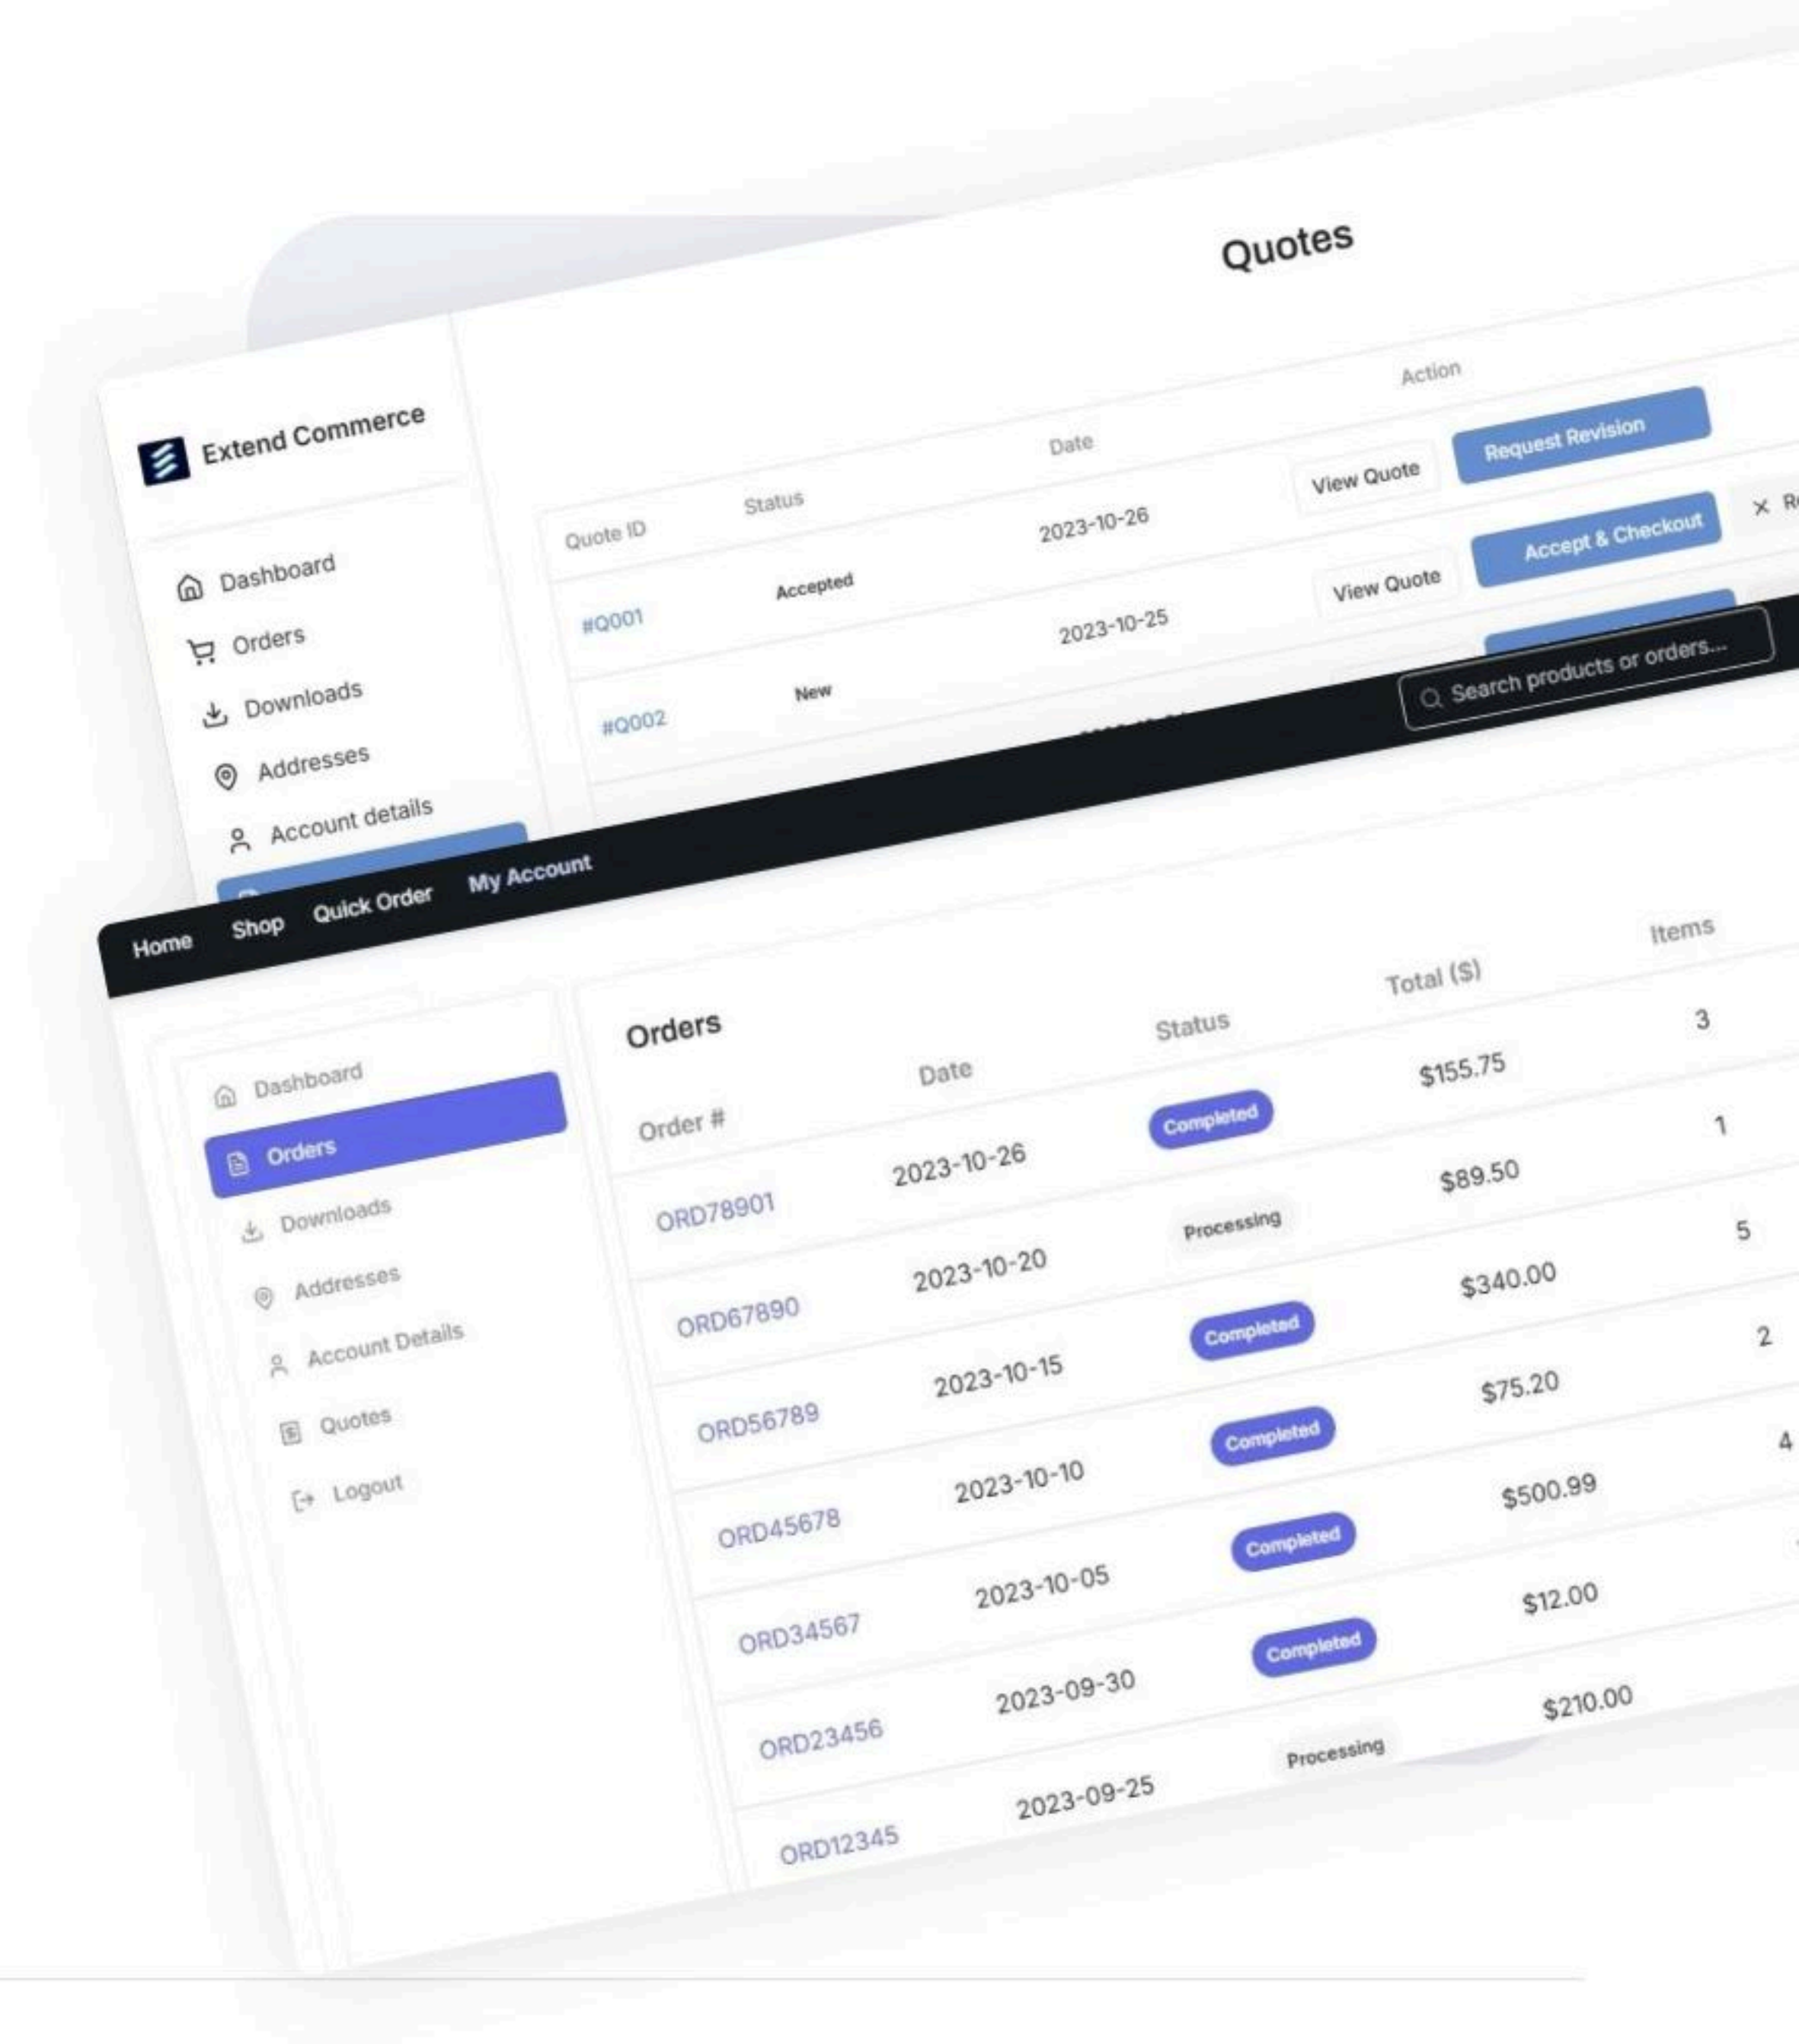

Automated bulk ordering, minimum order rules, and quote request flows to eliminate manual intervention and reduce operational complexity.

“Managing wholesale customers and pricing used to require multiple plugins. This solution unified everything into one stable system.”

Customer
Functionality

What we do more

We build reliable, scalable web solutions that turn ideas into fast, secure, and user-friendly digital products.

Frontend Engineering

Building fast, responsive, and user-friendly interfaces with modern web technologies.

System & CMS

We create flexible admin panels and CMS systems to manage content, settings, and data from one place.

Development

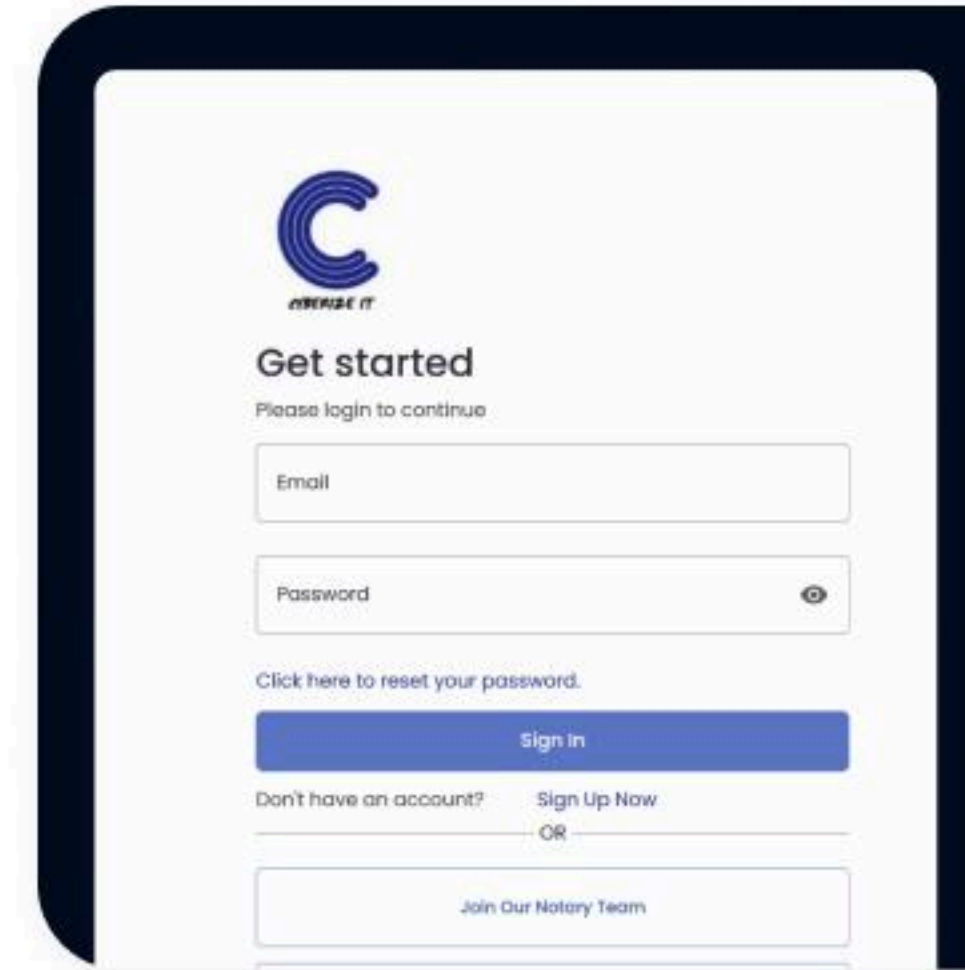

We develop high-performance web applications using modern technologies, secure APIs, and scalable architectures.

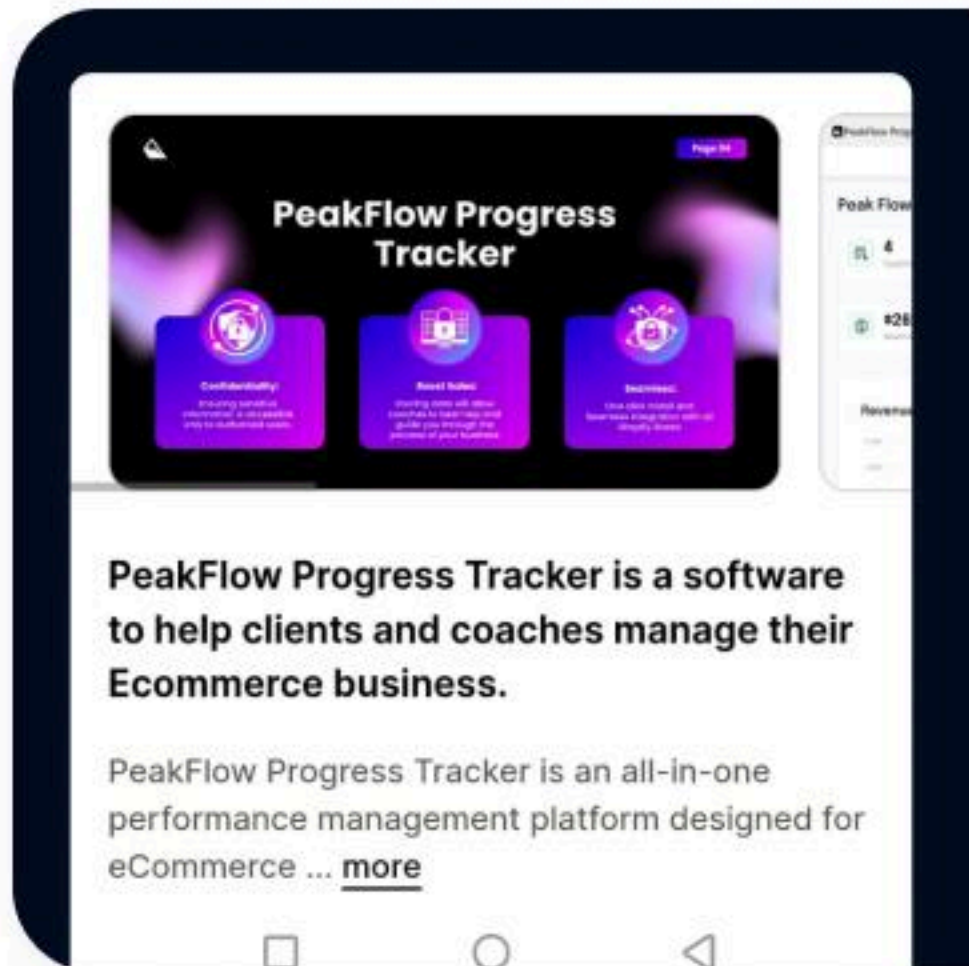

My Outfit Builder

Interactive Shopify app that transforms static product grids into drag-and-drop outfit building, increasing engagement and product discovery.

Cyberize It

Built a full-scale online notarization platform connecting customers and notaries through secure digital workflows. Implemented multi-role access (Admin, Customer, Notary), live video notarization, e-signatures, identity verification, and split payments

Peak flow progress Tracker

All-in-one ecommerce performance tracking platform for store owners, coaches, and agencies.

Extend – Booking Filters for WooCommerce

Advanced filtering solution for WooCommerce Bookings, improving discoverability and booking UX.
