About Extend B2B

(Product Tables for WooCommerce)

Extend B2B – Product Tables for WooCommerce is a performance-focused WooCommerce extension built to simplify product browsing and bulk ordering for stores with large or complex catalogs.

The plugin transforms the default WooCommerce shop layout into a structured, table-based product view, allowing customers to search, filter, sort, and add products to the cart quickly from a single interface. This approach is especially effective for B2B, wholesale, and high-SKU stores where speed and clarity are critical.

By focusing on usability, performance, and maintainability, Extend B2B – Product Tables helps merchants replace long product grids with a streamlined ordering workflow that scales with growing inventories and customer demand.

Solution **We** Provide

As developers, we built Extend B2B – Product Tables for WooCommerce to address performance and usability challenges faced by stores with large product catalogs and bulk-buying customers.

The solution focuses on replacing traditional product grids with a fast, table-based ordering interface, while maintaining full compatibility with WooCommerce core and existing store setups.

01

One-Click & Bulk Ordering

Built to enable fast purchasing workflows, allowing customers to add multiple products to the cart efficiently from a single interface.

02

Custom Product Data Display

Gives merchants full control over which product information is shown in the table, keeping the interface clear and relevant.

03

Variation Attribute Filtering

Allows customers to filter products based on variation attributes, making it easier to find the exact product configuration.

04

Smart Variation Handling

Intelligently manages product variations to ensure accurate pricing, availability, and add-to-cart behavior.

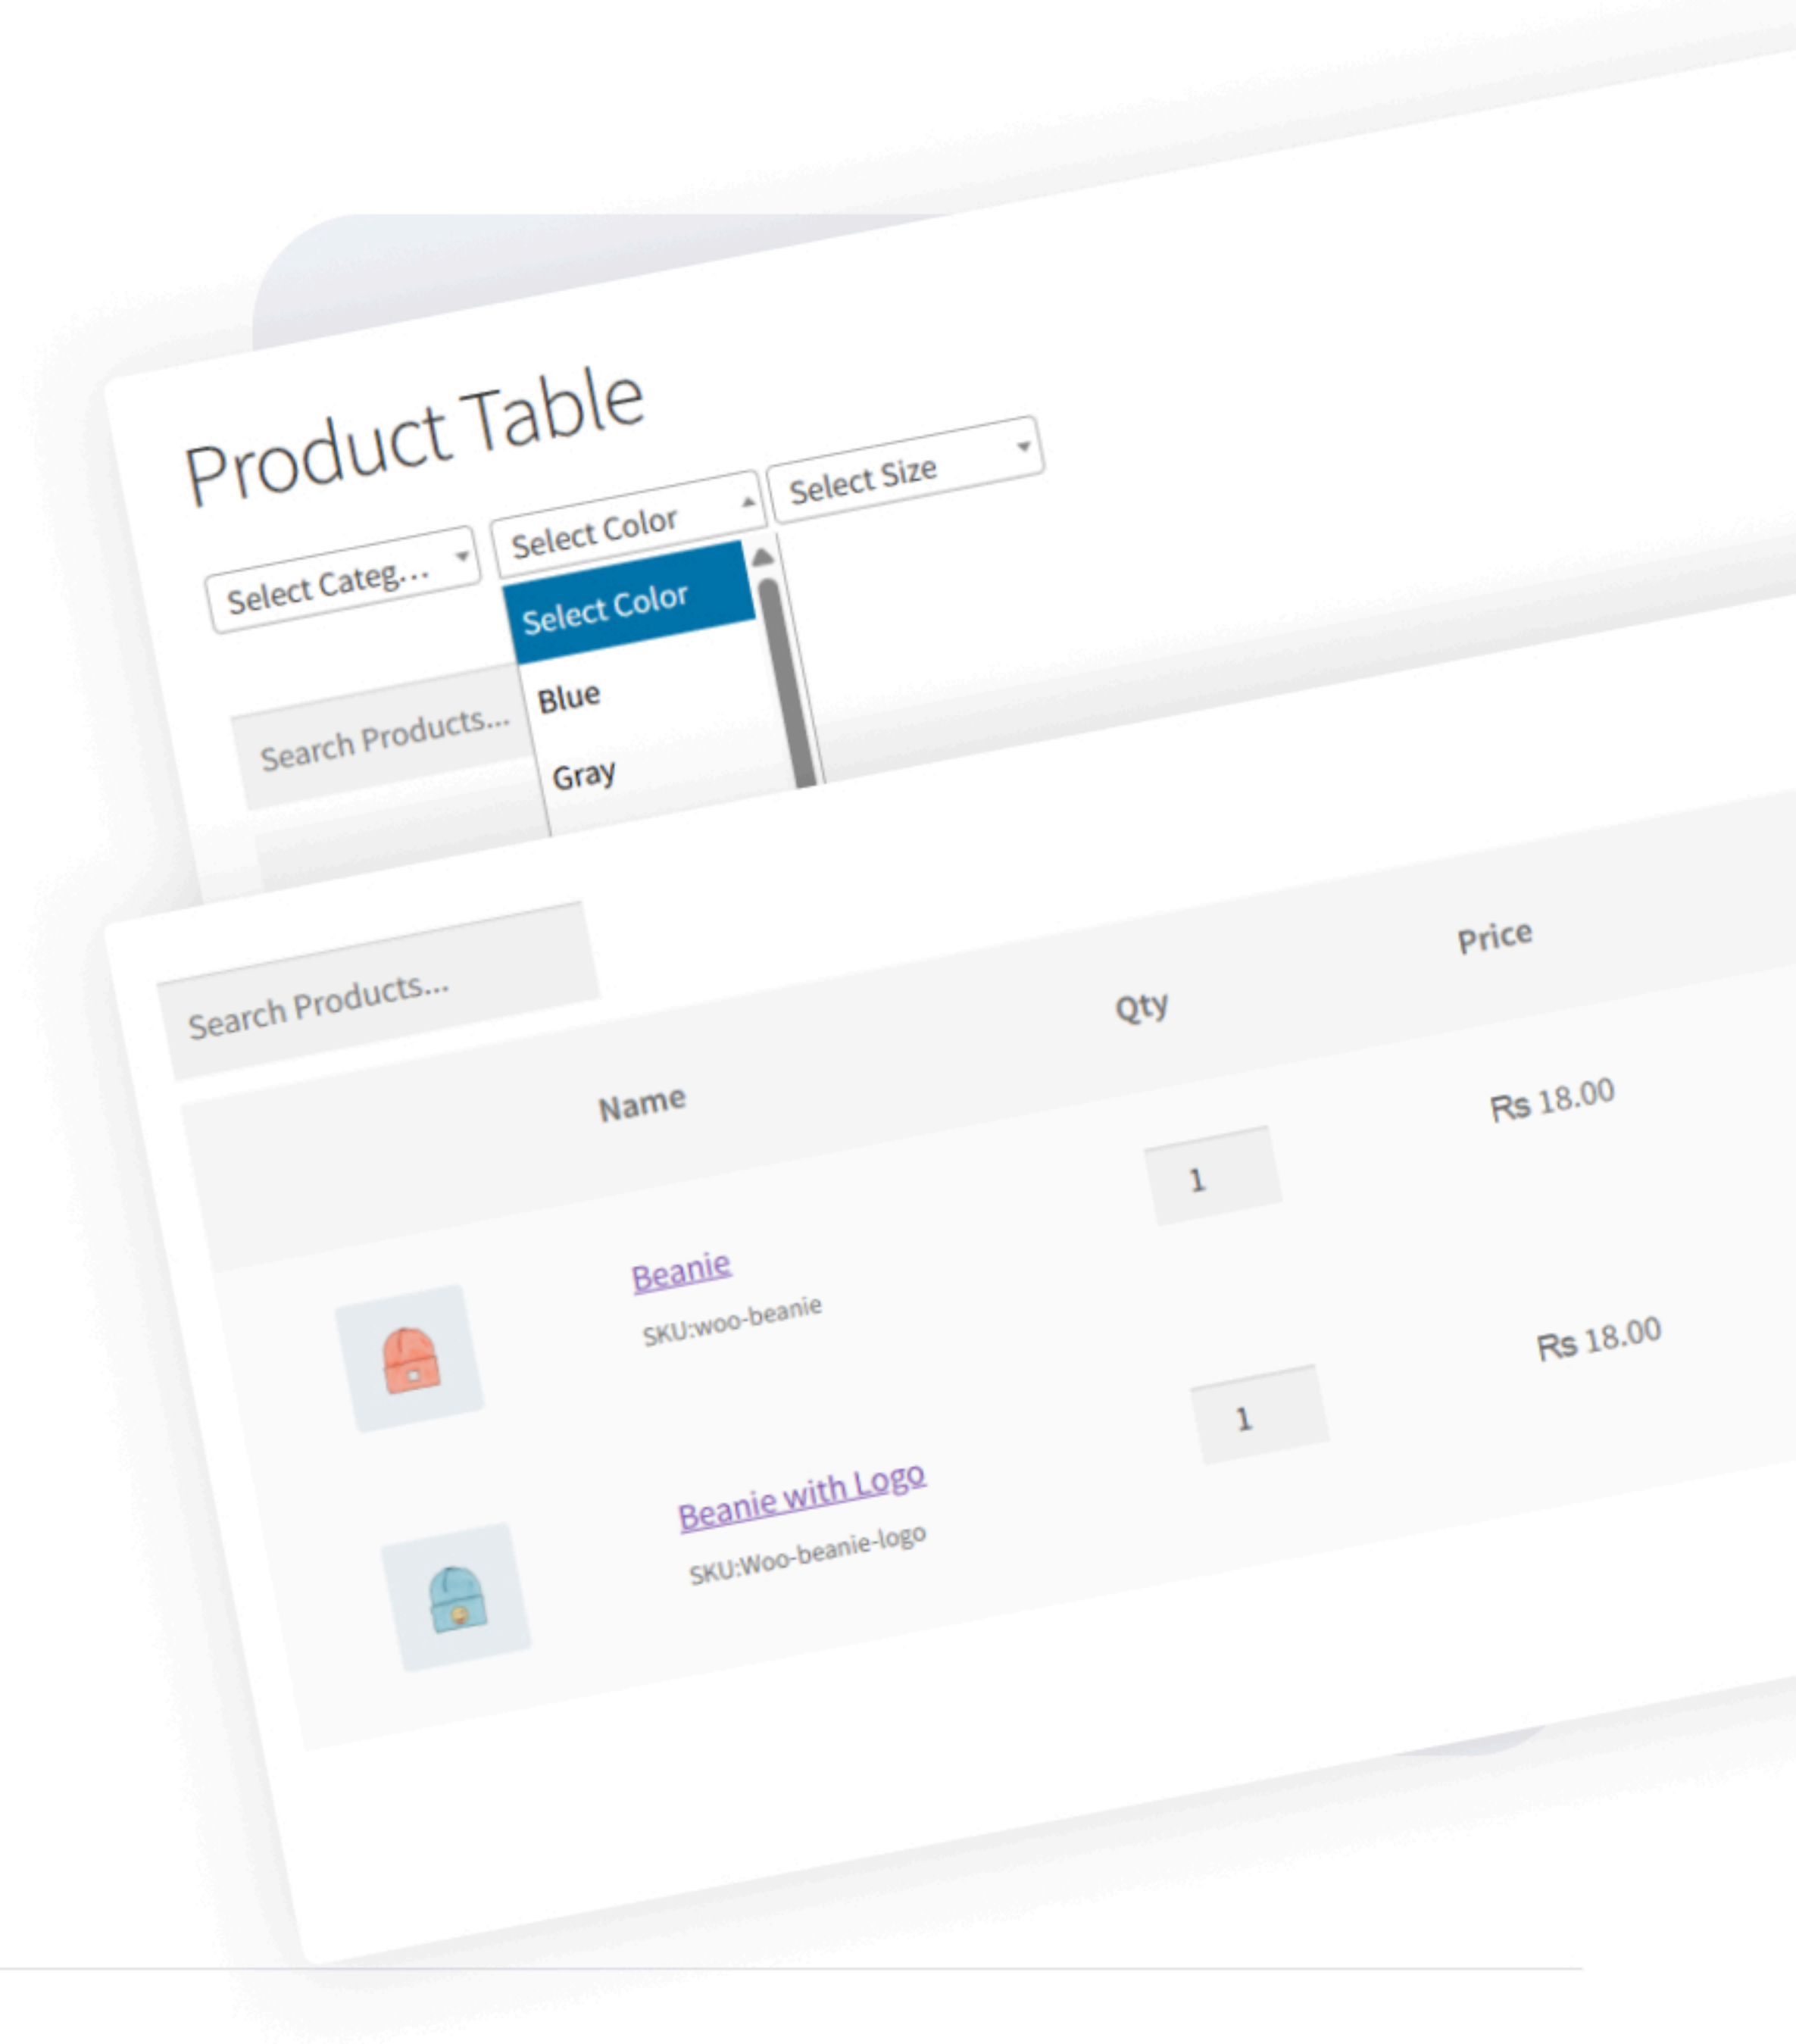

The product table significantly improved ordering speed for large catalogs.

Bulk purchasing is now faster and more intuitive

Store Owner

What we do more

We build reliable, scalable web solutions that turn ideas into fast, secure, and user-friendly digital products.

Frontend Engineering

Building fast, responsive, and user-friendly interfaces with modern web technologies.

System & CMS

We create flexible admin panels and CMS systems to manage content, settings, and data from one place.

Development

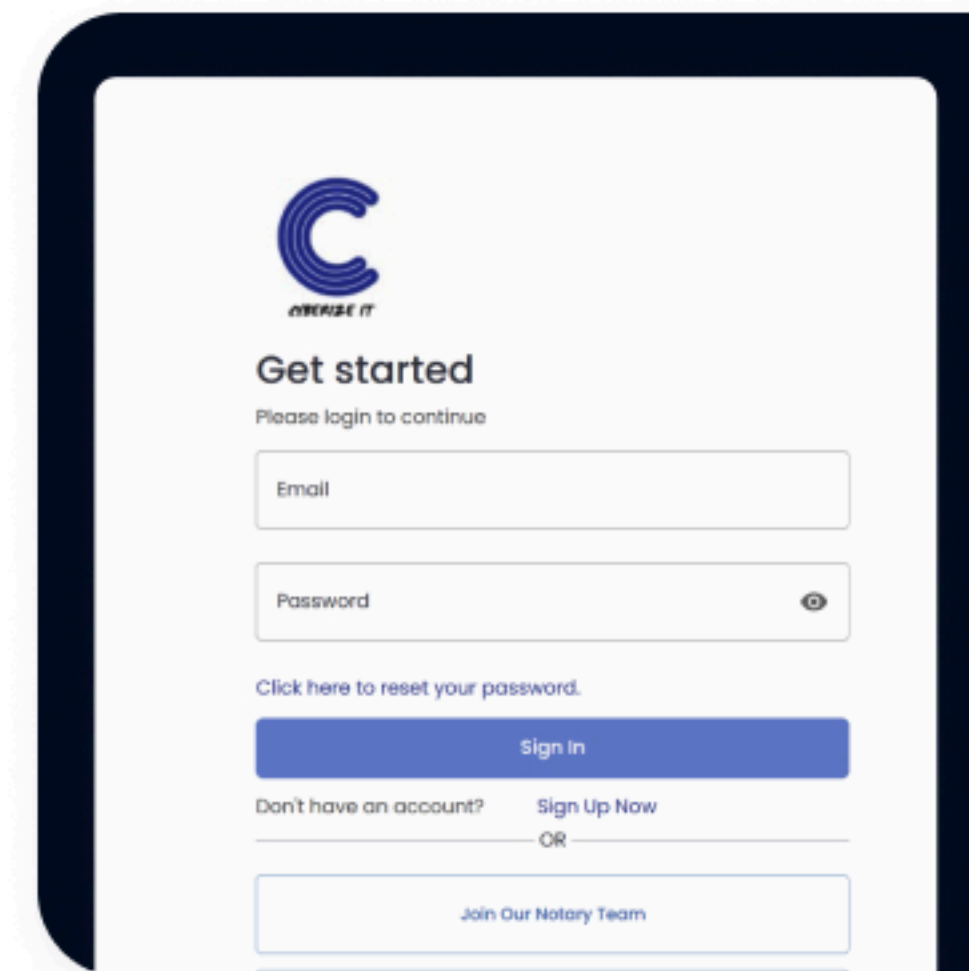

We develop high-performance web applications using modern technologies, secure APIs, and scalable architectures.

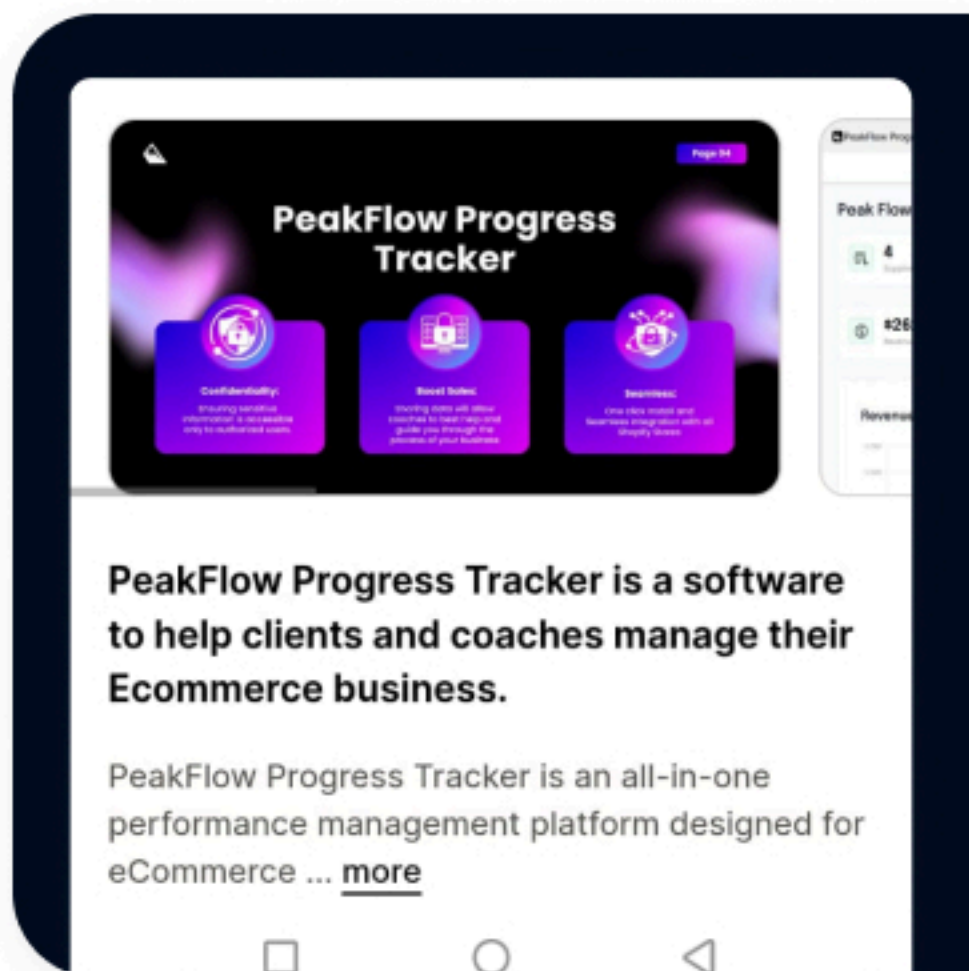

My Outfit Builder

Interactive Shopify app that transforms static product grids into drag-and-drop outfit building, increasing engagement and product discovery.

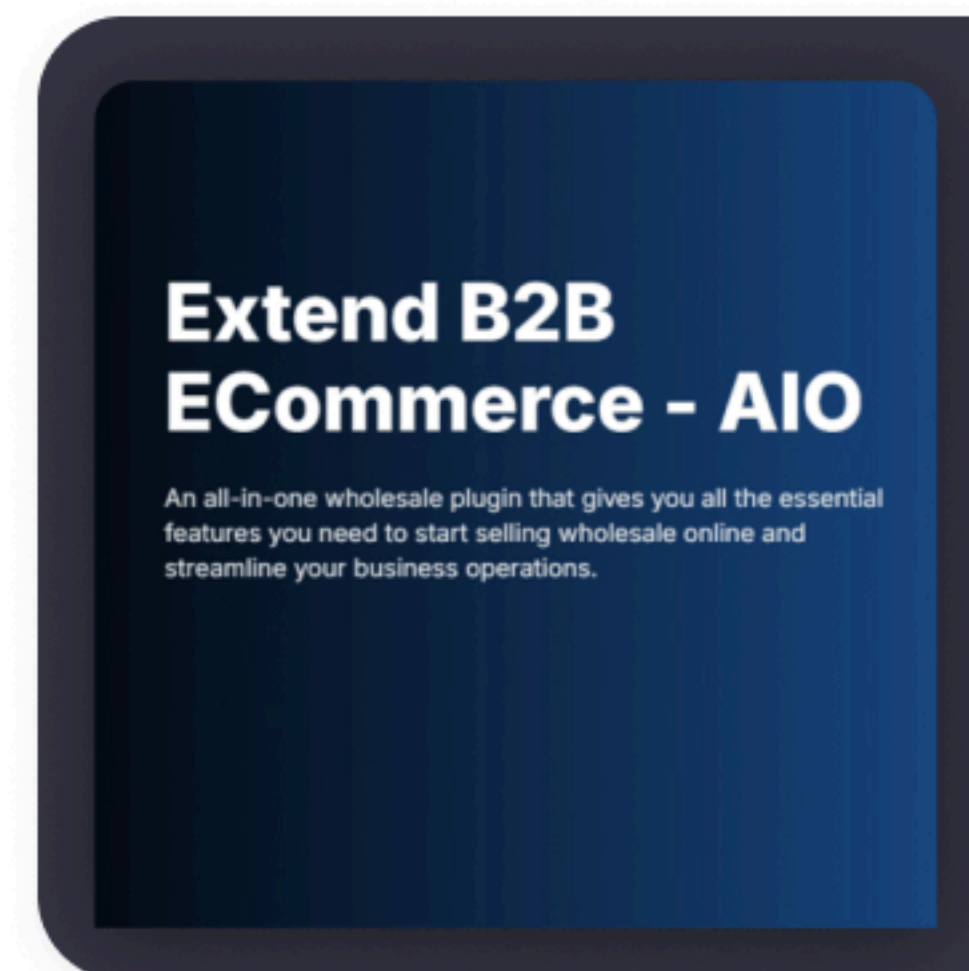

Cyberize It

Built a full-scale online notarization platform connecting customers and notaries through secure digital workflows. Implemented multi-role access (Admin, Customer, Notary), live video notarization, e-signatures, identity verification, and split payments

Peak flow progress Tracker

All-in-one ecommerce performance tracking platform for store owners, coaches, and agencies.

Extend B2B – Ecommerce AIO for WooCommerce

Comprehensive B2B ecommerce solution for WooCommerce with advanced pricing, roles, and business workflows.
