About Extend

(Booking Filters for WooCommerce)

Extend – Booking Filters for WooCommerce is a premium WooCommerce extension that enhances the WooCommerce Bookings experience by adding powerful filtering and search capabilities to your booking catalog.

Built as an add-on to the WooCommerce Bookings extension, this plugin helps customers find available bookable products faster by letting them filter listings using criteria like dates, times, price ranges, categories, tags, attributes, keywords, and ratings

Whether you sell appointments, rentals, classes, accommodation, or events, this extension makes it easy for visitors to discover the right booking options that match their preferences and availability—leading to faster decisions and higher conversion rate.

Solution we Provide

As developers, we built Booking Filters for WooCommerce to enhance the WooCommerce Bookings ecosystem by solving a core usability problem—finding the right available booking quickly.

The solution focuses on performance, compatibility, and extensibility, allowing merchants to offer advanced booking search and filtering without modifying WooCommerce core or existing booking logic.

01

Advanced Booking Filters

Designed and implemented flexible filtering for bookable products, enabling users to search by availability, price, categories, attributes, and keywords.

02

Seamless Booking Integration

Built the solution as a native extension for WooCommerce Bookings, ensuring accurate availability handling and full compatibility with existing booking rules.

03

Block & Shortcode Support

Enabled filters to be placed anywhere on the site using Gutenberg blocks and shortcodes, giving merchants full layout and UX control.

04

Performance-Focused Architecture

Optimized query handling and filtering logic to support large booking catalogs without impacting page load or booking performance.

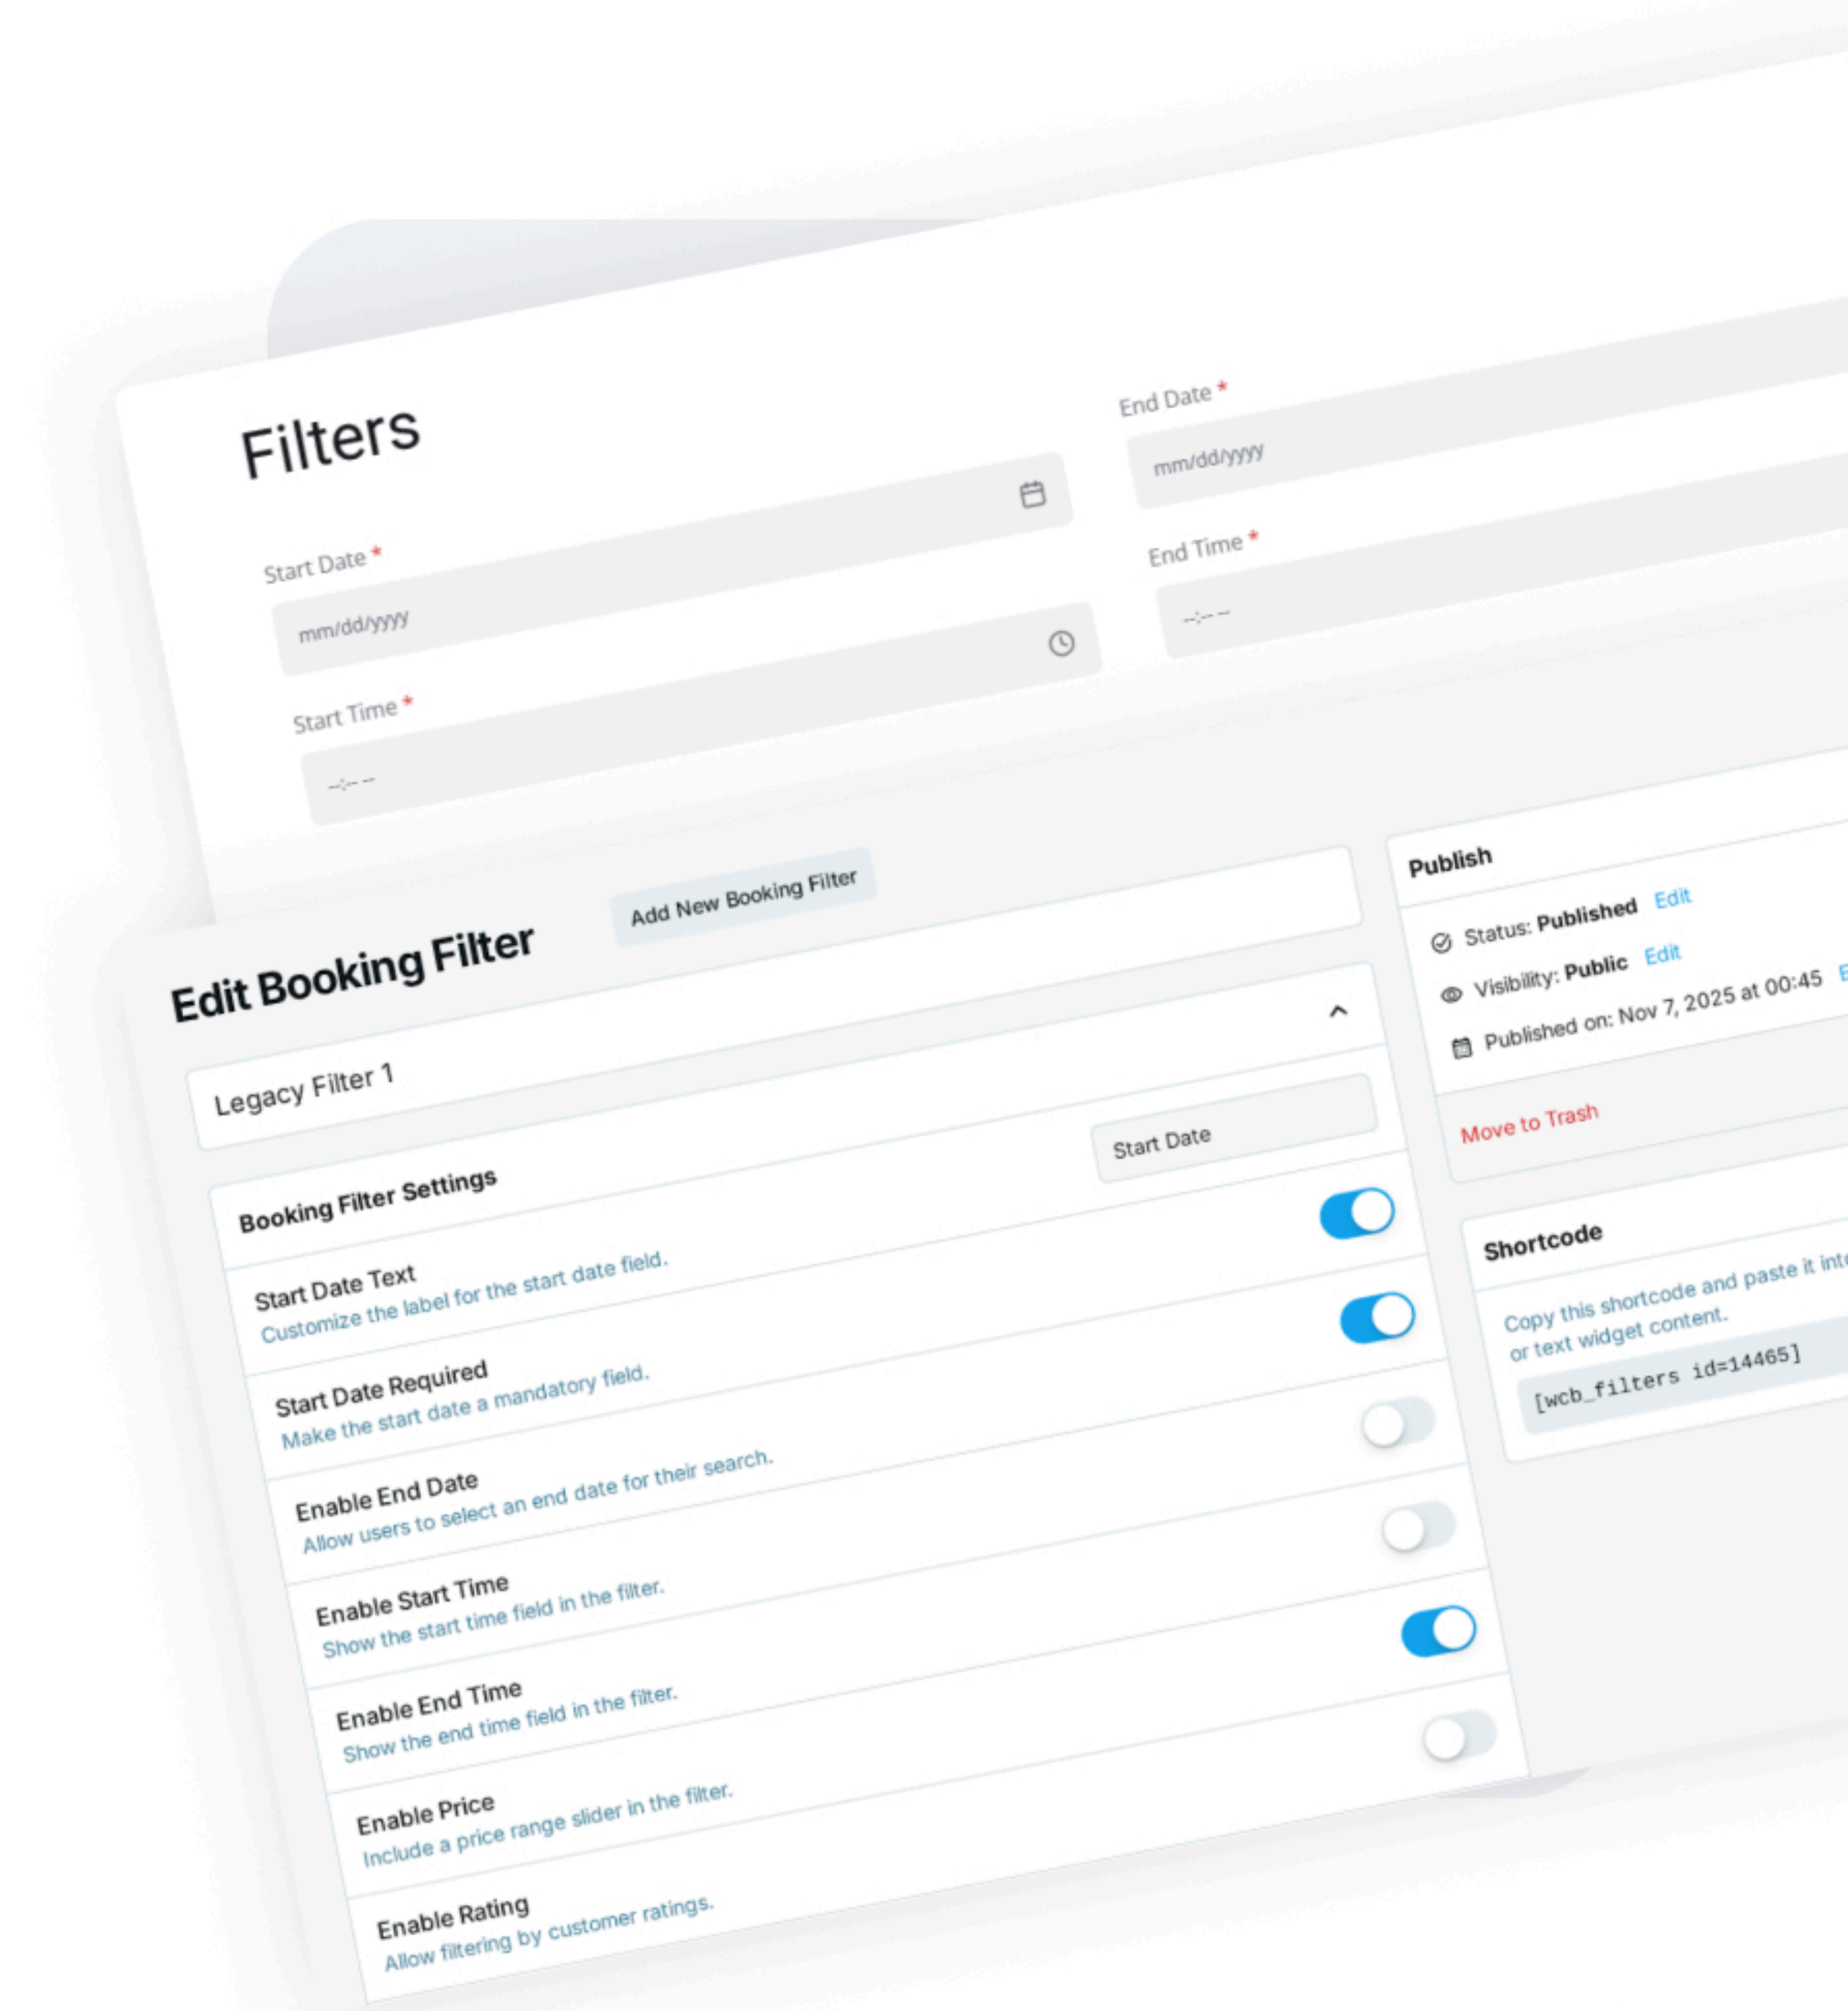

The booking filters significantly improved how customers discover available bookings. The integration remained stable and accurate across all booking scenarios."

Store Owner

What we do more

We build reliable, scalable web solutions that turn ideas into fast, secure, and user-friendly digital products.

Frontend Engineering

Building fast, responsive, and user-friendly interfaces with modern web technologies.

System & CMS

We create flexible admin panels and CMS systems to manage content, settings, and data from one place.

Development

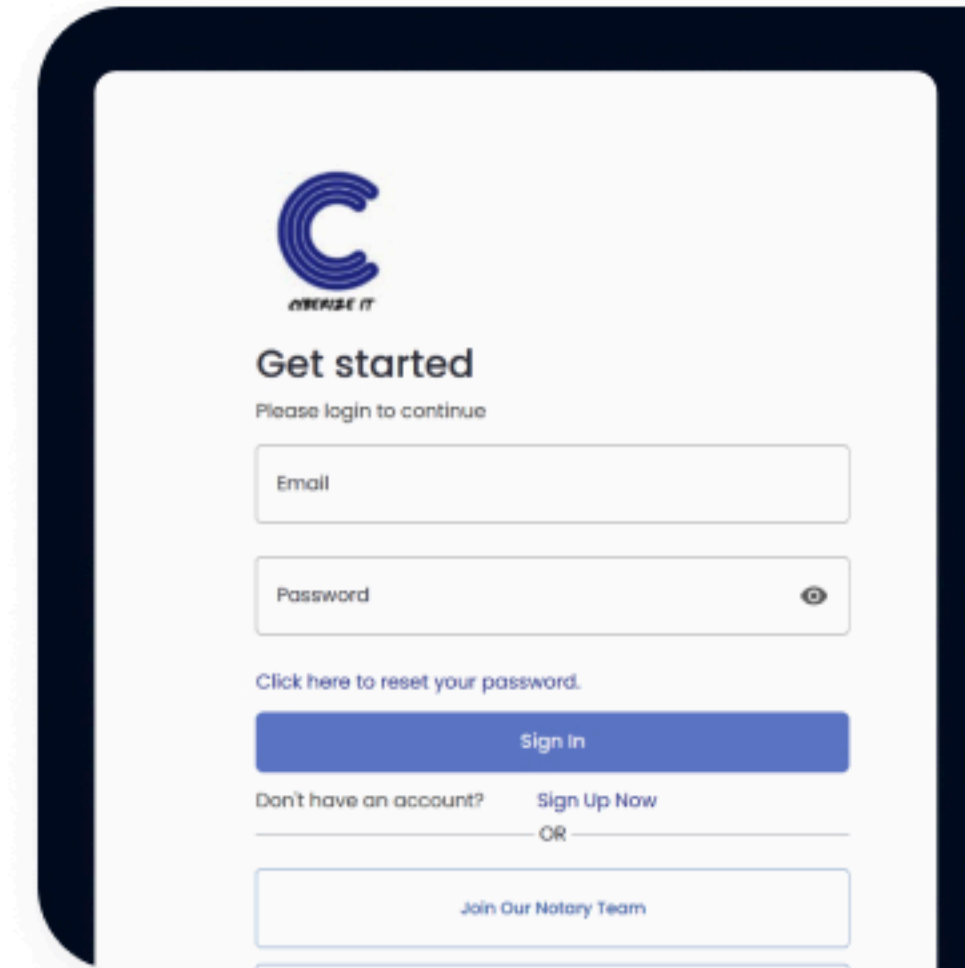

We develop high-performance web applications using modern technologies, secure APIs, and scalable architectures.

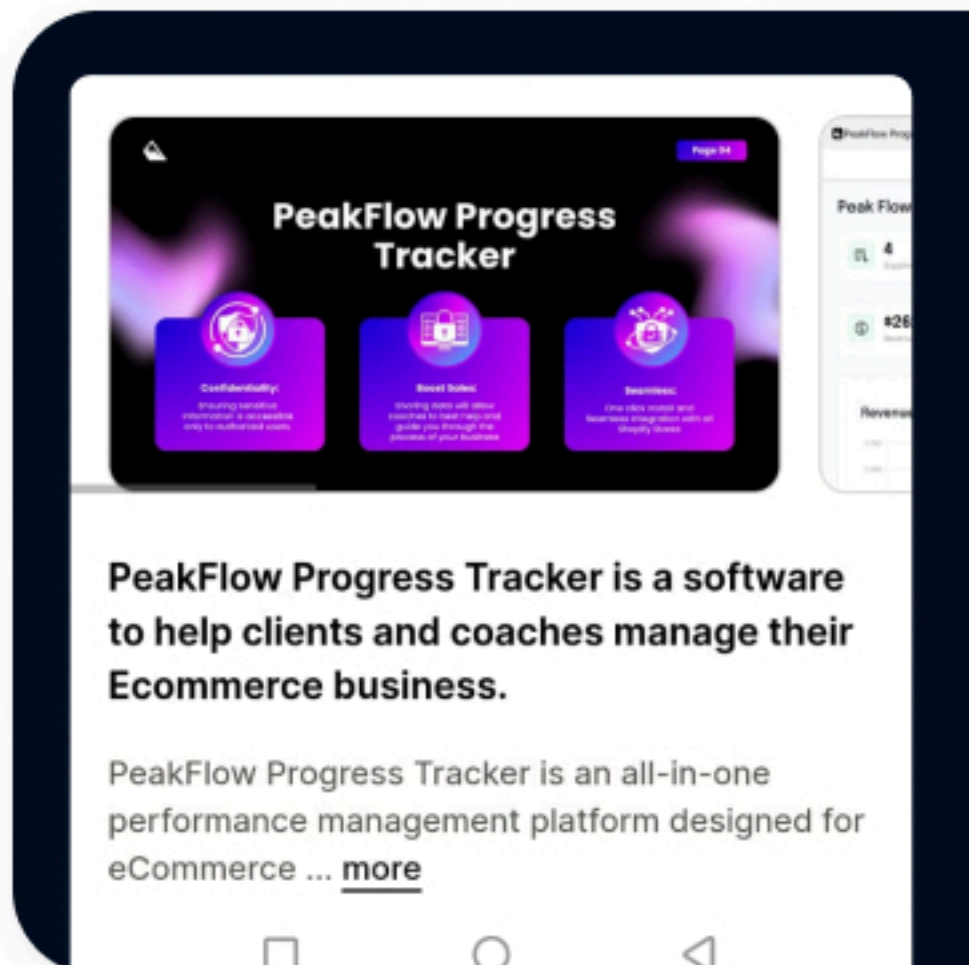

My Outfit Builder

Interactive Shopify app that transforms static product grids into drag-and-drop outfit building, increasing engagement and product discovery.

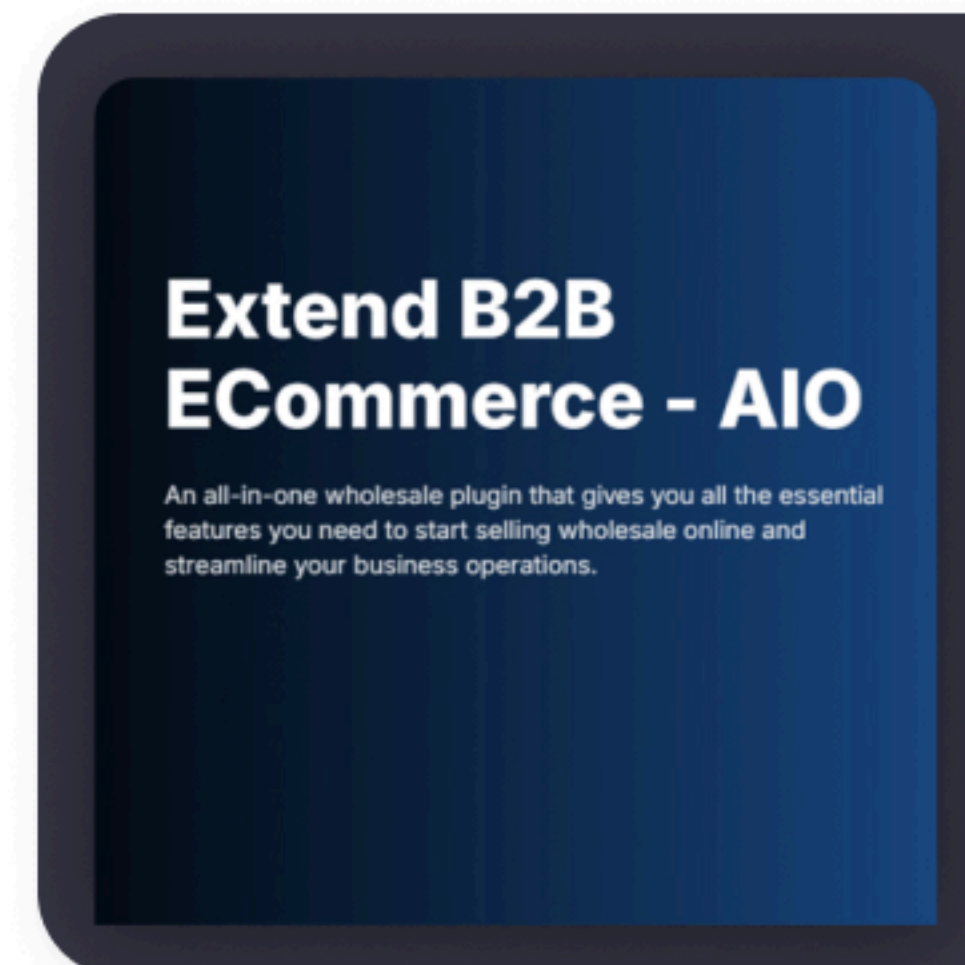

Cyberize It

Built a full-scale online notarization platform connecting customers and notaries through secure digital workflows. Implemented multi-role access (Admin, Customer, Notary), live video notarization, e-signatures, identity verification, and split payments

Peak flow progress Tracker

All-in-one ecommerce performance tracking platform for store owners, coaches, and agencies.

Extend B2B – Ecommerce AIO for WooCommerce

Comprehensive B2B ecommerce solution for WooCommerce with advanced pricing, roles, and business workflows.
