About My Outfit Builder

Outfit Builder is a Shopify app that allows merchants to create interactive outfit-building experiences directly on their store. Customers can mix and match products to visualize complete looks.

The app helps brands showcase collections in a more engaging way, allowing shoppers to explore multiple items together and discover styling combinations.

Designed for fashion stores, Outfit Builder increases product discovery, improves customer engagement, and encourages customers to purchase complete outfits instead of single items.

Solution we Provide

Built Outfit Builder, a Shopify app that enables merchants to create bundled looks, mix-and-match outfits, and increase average order value through a seamless shopping experience.

01

Outfit & Bundle Creation

Allows merchants to create complete outfits by combining multiple products into a single, shoppable set with flexible pricing rules.

02

Variant & Inventory Sync

Automatically syncs product variants and inventory in real time to ensure accurate availability across bundled items.

03

Seamless Storefront Experience

Displays outfits directly on product and collection pages with a clean, conversion-focused UI that blends into the theme.

04

Revenue Optimization

Boosts AOV by encouraging cross-selling and upselling through curated looks without disrupting the checkout flow.

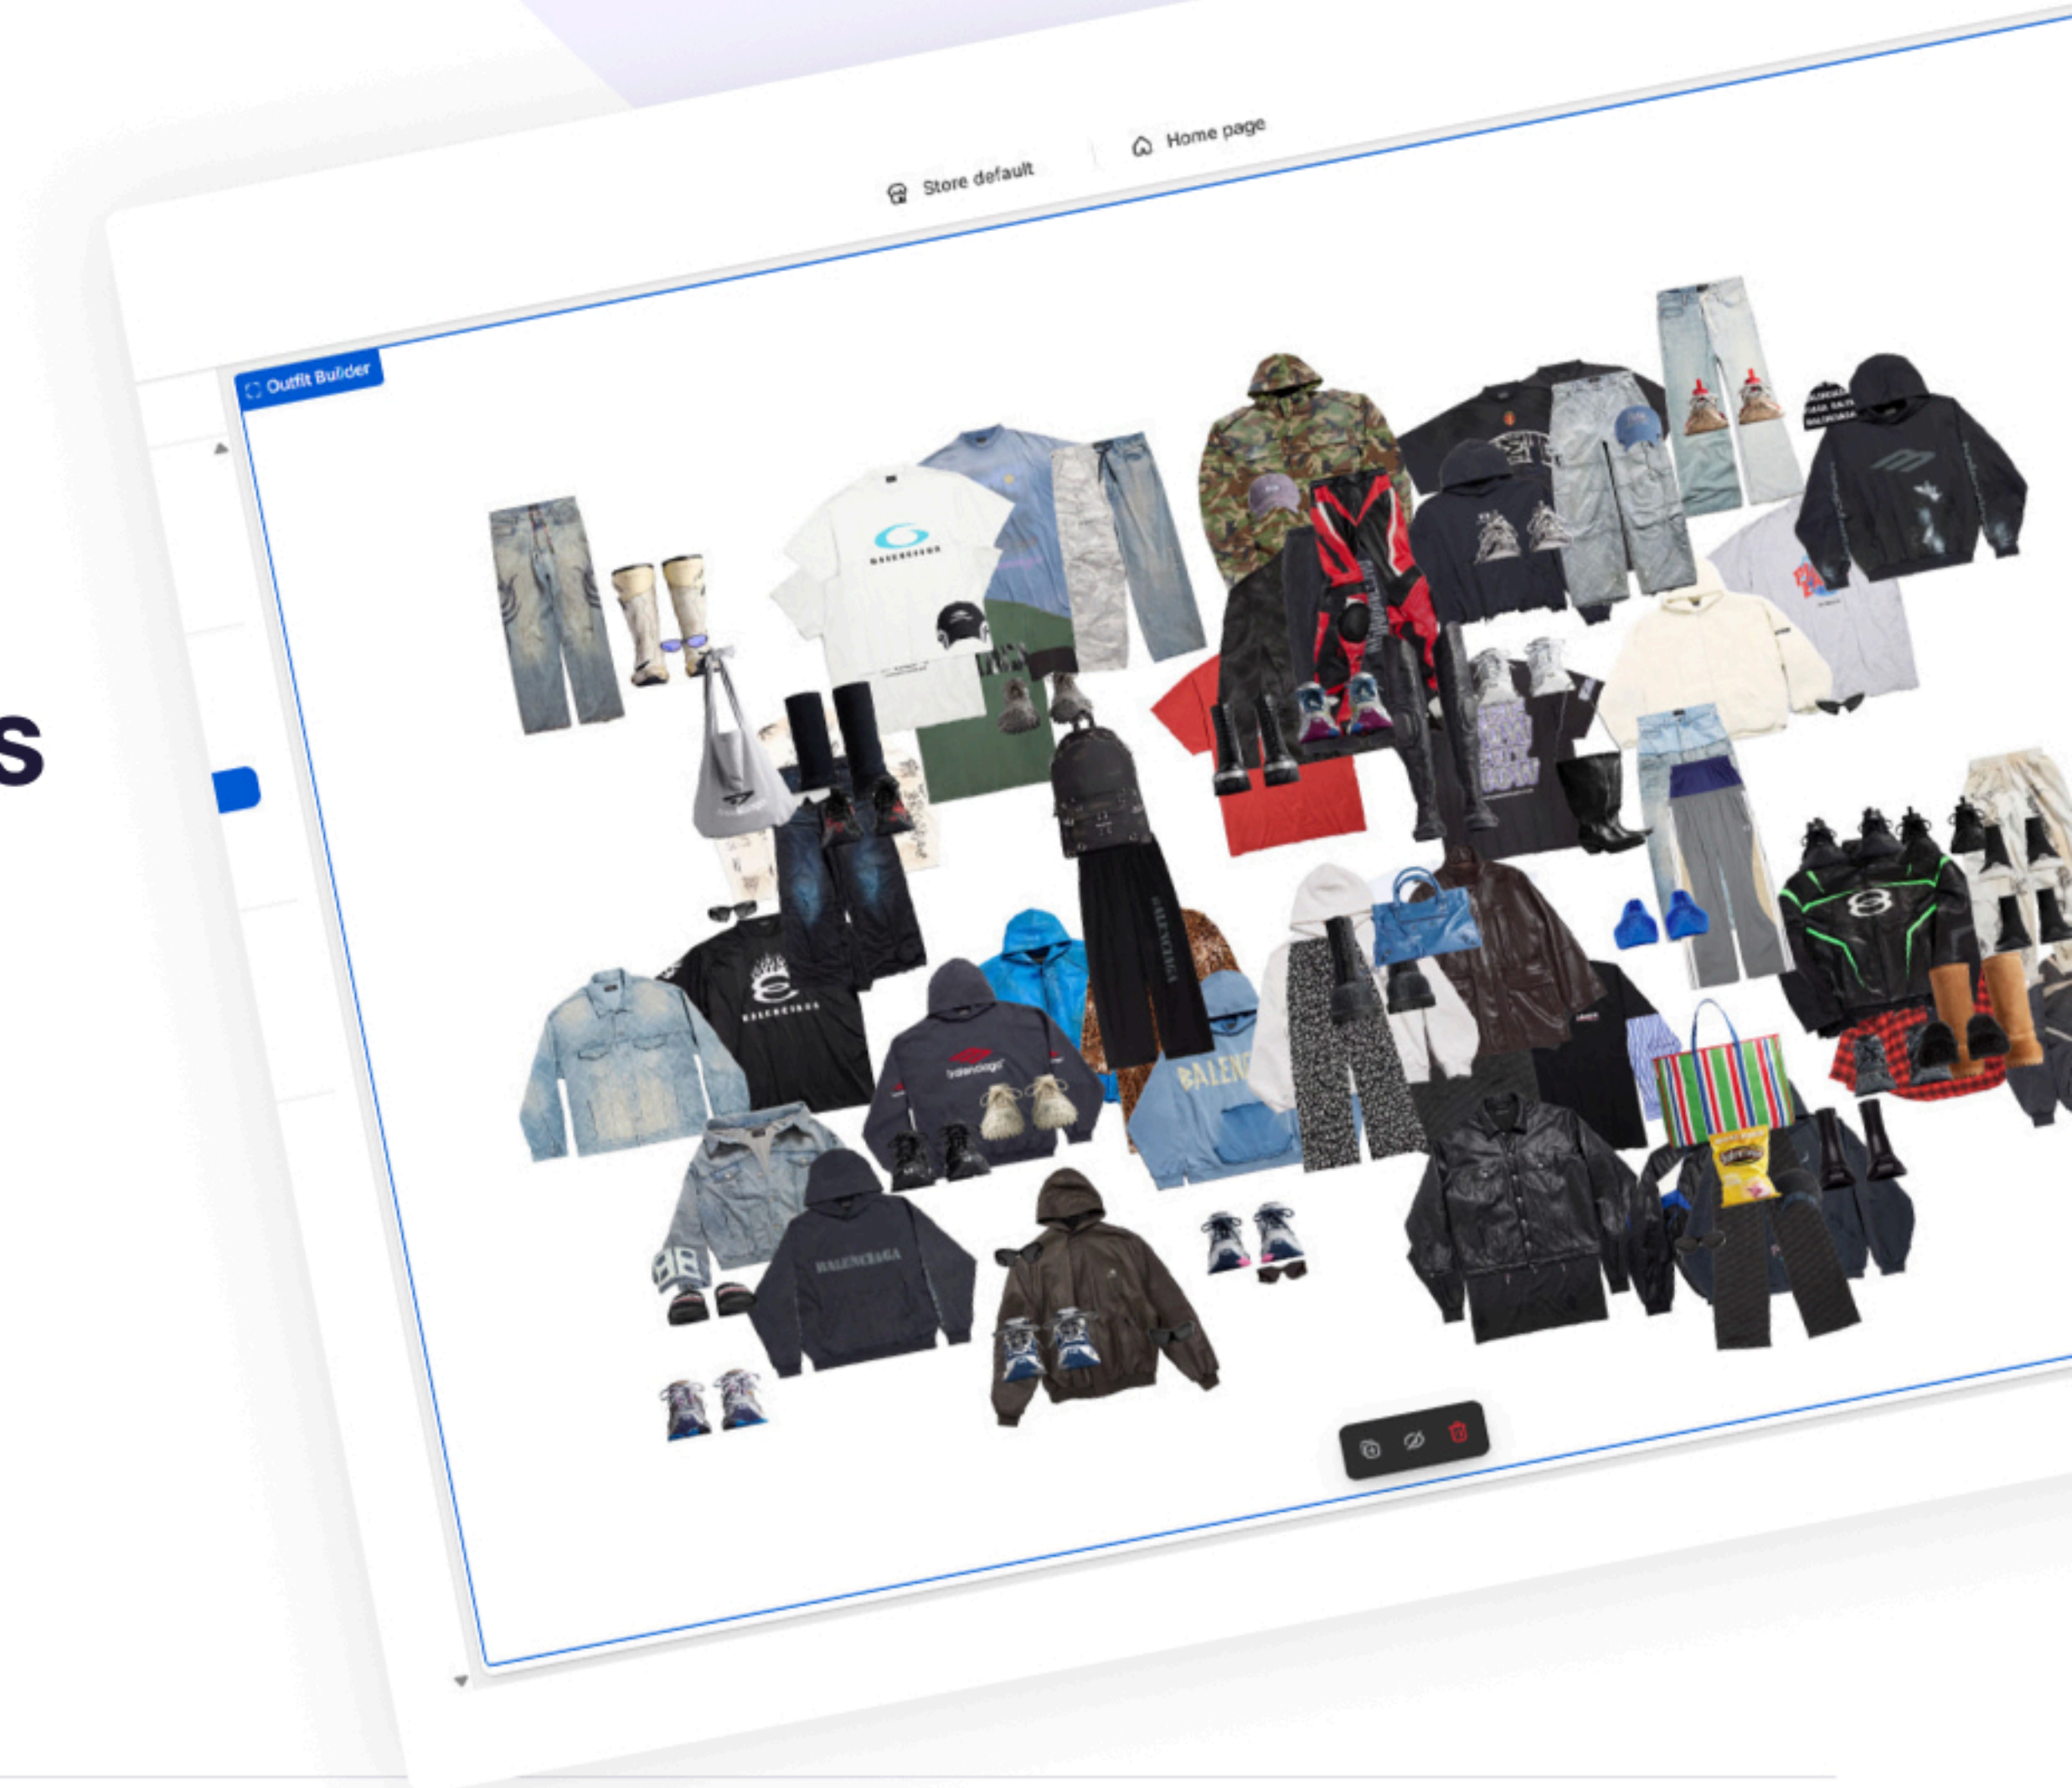

**“Perfect for cross-selling.
Customers love building outfits,
and we’ve seen higher cart values
without changing our checkout
flow.”**
